CESSNA 182T

CESSNA CARAVAN

Reference Letter

I have contacted Gerald Hintermayr and his team at Aircraft and More GmbH in 2022 for support in purchasing an almost new Cessna 182T. The professionalism, client support and transparency have been outstanding throughout the whole process.

I have received all the necessary information from the onset, including relevant photos. Gerald was more than happy to accommodate myself and my team for a prebuy inspection, on a date that suited us. We were presented with a folder with drafts of all sale paperwork, for us to familiarize ourselves with and we were able to check aircraft documents. After the purchase went through, Gerald flew the aircraft to Bucharest himself, making sure we received it in pristine condition.

Since we decided on keeping the German registration call sign, the Aircraft and More team took care of all the paperwork and communication with the German authorities.

There is no better way of recommending a company than working with them again!

So, this year, we employed the services of AAM INTL GmbH, another company part of the Aircraft and More Holding into ferrying a new Cessna Caravan from US to Romania. The ferry took 5 days to complete, an absolute record given the weather and the time of the year (end of October). I was kept up to date all the time with the progress of the ferry, and I always felt that my aircraft couldn't have been in better hands!

I would like to thank Gerald and his team for all the support I received and the professionalism in doing business.

Best regards,

Peter VASILE
